Letter of Reference for Custom Weld Mfg.

The Ada County Sheriff's Office in Boise, Idaho, currently has two Custom Weld welded aluminum Marine Enforcement vessels. We have been pleased with our 2005 Model 20 ft. stern drive, and we recently acquired a new 2011 Model 22 ft. jet drive.

Our marine use is primarily lake waters, and our 2005 Custom Weld has held up well to heavy use with almost 2000 hours of service logged. The hull has a lifetime warranty and Custom Weld has addressed any issues we have had with the hull of the vessel.

Custom Weld was awarded the bid for our new patrol vessel this spring, and they worked diligently with our office to give us the best product for our use. The staff at Custom Weld demonstrated their professionalism as enforcement vessel manufacturers, offering suggestions based on their experience throughout the build process.

I would recommend Custom Weld Mfg. for a Marine Enforcement vessel based on the vessels we have purchased from them and their customer service.

Sincerely,

GARY RANEY
Ada County Sheriff

Sergeant Dave Monson
Ada County Sheriff's Marine Supervisor
